M FLOORING PRICE LIST- June 2016

(All Prices Include VAT)

M Flooring 20mm Engineered Oak products consist of precision machined, sustainable hardwood ply cores, topped with generous French Oak Veneers. This process results in superior stability vs traditional (solid) boards (which can often be prone to cupping due to changes in conditions). Our extra thick wear layers also mean there is absolutely no compromise in the longevity of your floor vs solid boards & type of construction results in a hardwood floor which is a delight to install! We are confident you & your floor fitter will both love your M Floor! (Ask us about our free equipment hire if installing your own wood floor, or if you think your fitter would like to borrow our specialist tools!)

M Flooring offers generous long lengths of timber and the thickest wear layers where ever possible (we always take proportions into account, and aim to avoid stubby short lengths like those seen in a lot of cheaper floors). We aim to be competitive, without compromising on the overall quality of goods we offer and pride ourselves on our comprehensive level of service.

Solid & Engineered Blocks and Chevrons are again all European Oak, with all products on offer being sustainably sourced. We offer a wide range of accessories, adhesives, underlays & thresholds to complement all of our floors. Other products are also available which may not necessarily be listed below (pay us a visit in Pontyclun to see our comprehensive range).

Stocked Items delivered in a matter of days, lead-times on other goods usually 1-2 weeks maximum.

(Prices & Specifications may vary from time to time, current prices & specifications will be confirmed in writing at point of order).

... Deals available for larger orders!
